

Surgical Services Improvements

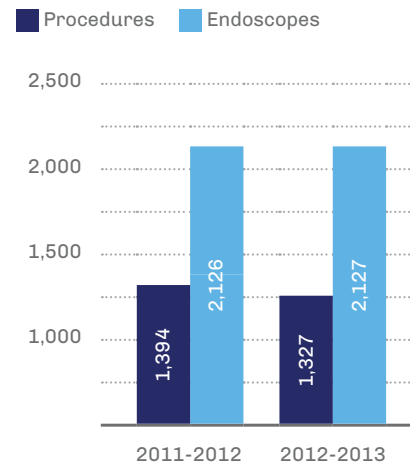

The current surgical program operates out of the Bethesda Regional Health Centre & Hôpital Ste. Anne Hospital, and provides general surgical and arthroscopic procedures as well as shoulder arthroscopes.

Bethesda Regional Health Centre is equipped with two operating theatres, one endoscopic suite and a six bed recovery/same-day surgery unit.

Staff, surgeons and anesthetists work at both sites on a rotation basis. Emergency surgeries are available 24/7 at the Bethesda Regional Health Centre.

In the 2011-2012 Health Plan, Southern Health -Santé Sud made a new surgical suite/unit its number one priority.

Total Procedures

URGENT NEEDS AT THE BETHESDA REGIONAL HEALTH CENTRE:
